Transitions:

Between the ages of 33-35 months, toddlers will begin the transition to preschool. The decision of when a child begins this transition is based on the child's development, the ages of other children in the room, space, and many other factors. Parents are encouraged to discuss transition issues with toddler and pre-school staff. The transition schedule of each child will be determined by the teachers and director and discussed with parents prior to the start of the transition.

Note: Be sure to update your child's Health Care Summary and immunizations each time he/she transitions to the next age group!
